Honorable William J. Casey
Director of the CIA
Washington, D.C. 20505

Dear Bill:

The Center for Strategic and International Studies is proud to announce a new and exciting series of open seminars focusing on the public policy implications of critical emerging technologies. We are especially pleased that Dr. Edward Teller, the noted nuclear philosopher and physicist, has agreed to initiate the Science and Technology Seminars on January 18, 1983, at 4:00 p.m. in the Wadsworth Room of the International Club, 1800 K Street, Washington, D.C. He will address the current and possible future developments in particle beam weapons technology, at present a topic of high interest and considerable controversy among the strategic and military communities; he will be available for what promises to be a lively discussion and question-and-answer session following his talk. I would be honored if you would join Dr. Teller and the Center's other guests on this occasion.

If you cannot attend in person, we would welcome your representative, or, if you wish to bring an additional guest, we are prepared to accommodate you both. I enclose a post-card for your convenience in responding; hope you are able to fit this into your busy schedule.

Sincerely,

David M. Abshire
